What are VIP Coins?

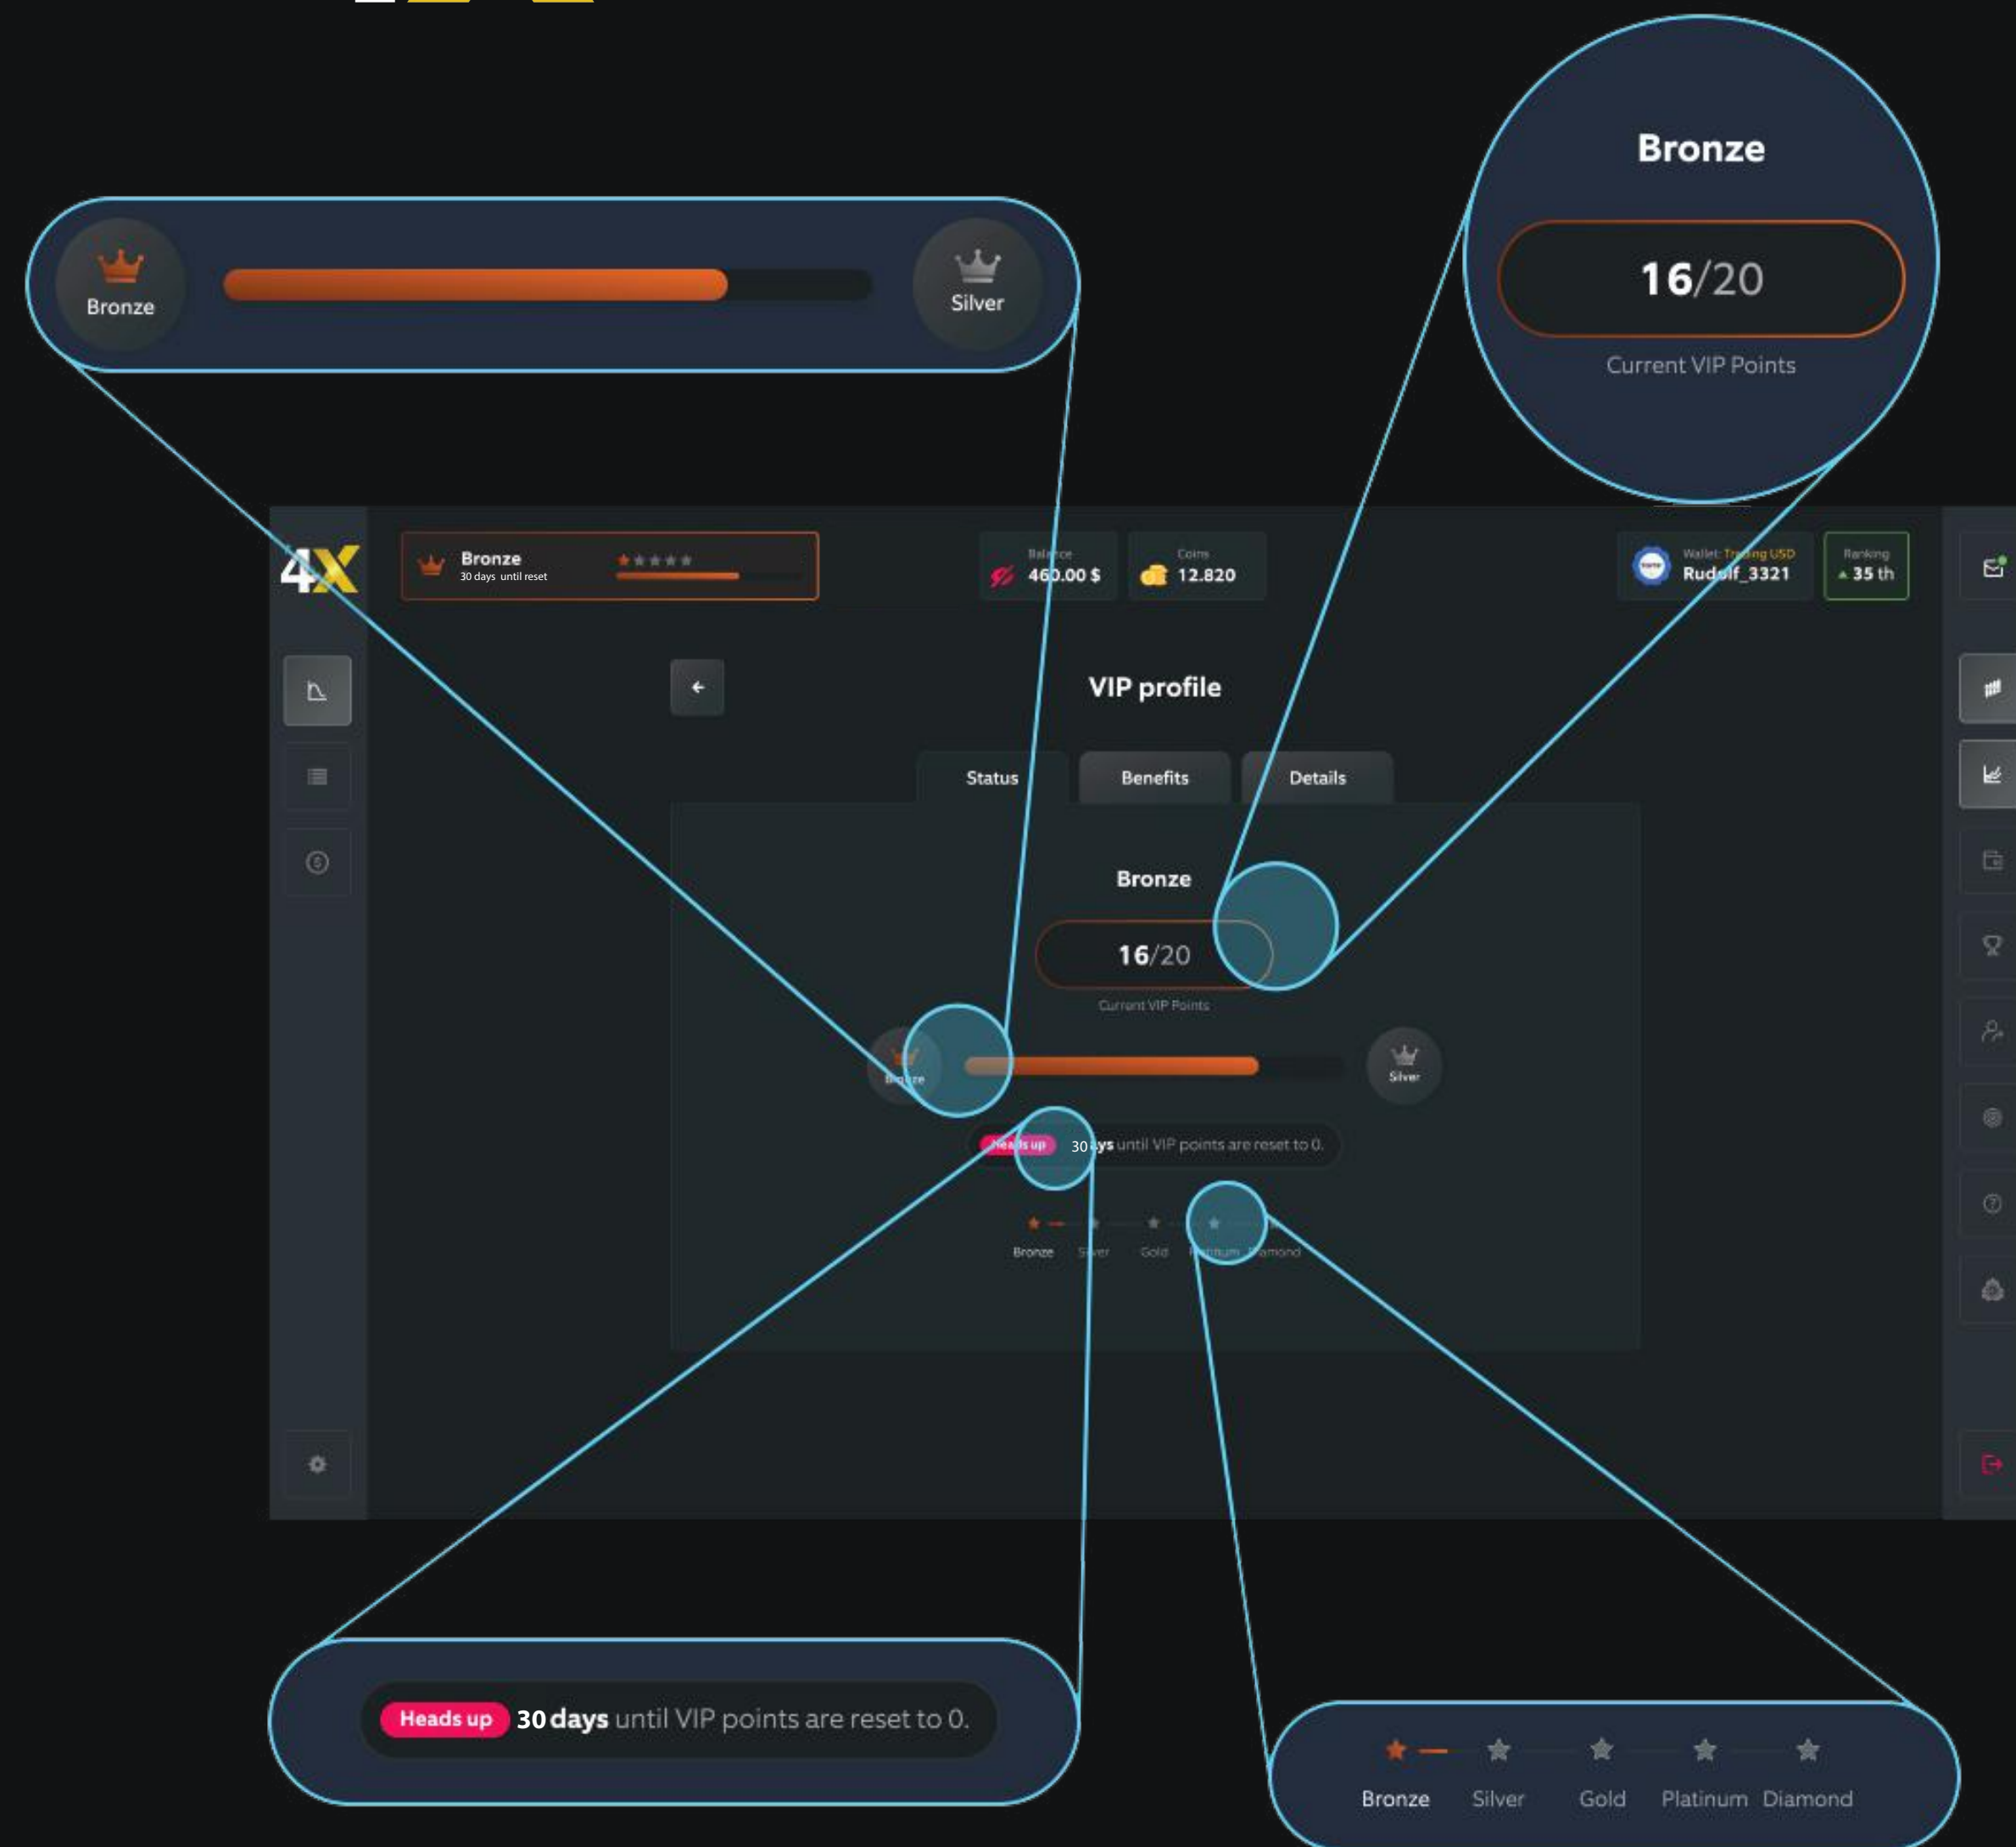

VIP Coins are accumulated with every trade, once your stake size accumulated reaches \$1/point you will receive 100 coins.

How are my coins calculated?

Once the coin is received, the level multiplier will apply, and the value of the coin will be displayed. For example, if your current level is Silver and you trade the stake \$1/point twice, you will see $200 \times 1.5 = 3$ coins on your dashboard.

What is the Level multiplier?

It is the benefit that helps you accumulate the monthly coins required faster. The higher the level the higher the multiplier.

How long I will retain the VIP status?

After achieved, the VIP level is valid for 30 days. During this interval of 30 days, you can trade the required number of coins to achieve the next VIP level. You need to trade the minimum maintenance amount for each level to retain your current VIP status. If the interval of 30 days elapses and you cannot make the maintenance amount, your VIP level will be downgraded to the previous one .

What happen if I do not trade for 30 days?

You can only drop one level per 30 days. For example, if you are on The4X Club Level, the lowest level you can be once 30 days has elapsed is Platinum.

The screenshot shows the 'VIP profile' page with a modal window titled 'Benefits for each level'. The modal contains a table with the following data:

Will I drop to the previous level if do not complete the coins required?

You can remain on your current level if you complete the half of the coins required to get to that level.

How can I convert my coins into cash?
